Abstract The names of *Leptodermis pilosa* Diels var. *acanthoclada* Lo and *L. pilosa* Diels var. *spicatiformis* Lo are invalid because no type specimens were indicated in the protologue when they were published. Two names are here validated at the rank of variety, with the specimens designated as types. A key to varieties in *Leptodermis pilosa* Diels and a distribution map of two new varieties and their relatives are provided.

Key words Rubiaceae, *Leptodermis*, *Leptodermis pilosa* var. *acanthoclada*, *Leptodermis pilosa* var. *spicatiformis*, validation.

摘要 刺枝野丁香 *Leptodermis pilosa* Diels var. *acanthoclada* Lo 和穗花野丁香 *L. pilosa* Diels var. *spicatiformis* Lo 发表时没指明模式, 是不合格发表的名称。现通过指定模式, 将它们的名称作合格发表。还对此2新变种及其近缘类群提供了分类检索表和地理分布图。

罗献瑞(1999)在编研《中国植物志》茜草科Rubiaceae野丁香属*Leptodermis* Wall.时, 通过研究相关标本, 在川滇野丁香*Leptodermis pilosa* Diels下发表了2个新变种: 刺枝野丁香*L. pilosa* Diels var. *acanthoclada* Lo和穗花野丁香*L. pilosa* Diels var. *spicatiformis* Lo, 但没有指明模式。根据《国际植物命名法规》(McNeill et al., 2006)规则37.1, 这2个新变种是不合格发表的名称。我们查阅保存于中国科学院华南植物园植物标本馆(IBSC)的有关标本, 找出罗献瑞曾经研究过的原始材料, 认为这2个变种的建立是合理的, 但需要合法化, 故通过指定它们的模式标本而使其名称成为合格发表的名称。
